Spirituality is the soul of all mankind. It is the source for finding inner peace and the means to finding a rewarded life Full of joy. It is the pathway to elevate your soul while passing through life on earth.

Universal Spiritual Education is a training program that shows you how to lead your life and how to cultivate your spiritual nature. It is a practice that is not limited to race, religion, nationality, or culture.

Universal spirituality training generally can lead you across all fronts. It gives you the necessary means to be able to communicate with the universe, find the meaning of your life and allow you to reach the great illumination path.

In this training, we will go deeper into the practical history and the origins of spirituality. You will be able to examine and test all fundamental principles and concepts related to life as humans.

Also, this training provides you with many practical tools that can help you in daily spiritual life on earth.

One of the first tools you will be having in this training is.

The personal purification technique and that of learning to cleanse your environment.

The other tool that you are getting in this training is:

Learning how to establish a communication one to one with your “Lwa Naissance”, the spirit that assisted your birth.

Generally, for all the lessons you will get.

1) the lesson’s text in (Haitian Creole, French and English) that you can download so that the teaching is always available to you.

2) You also get the audio in 3 languages that you can download on your phone or your computer.
